SHEIKH MD FAYSAL

Jersey City, NJ 07307 • (201) 526-5280 • faysals1@montclair.edu • linkedin.com/in/faysal-msba

EDUCATION

Montclair State University (MSU) Jan 2025 – May 2026 (Expected)
Montclair, NJ
MS in Business Analytics | GPA: 3.76 / 4.0
F-1 OPT Available Jul 2026 — No Sponsorship Required During OPT Period
Relevant Coursework: Data Mining, Data Visualization, Data Wrangling, Database Systems, AI for Business, Optimization Methods, Business Process Management

Shahjalal University of Science & Technology (SUST) 2012 – 2014
Sylhet, Bangladesh
MBA, Finance and Banking

Shahjalal University of Science & Technology (SUST) 2008 – 2012
Sylhet, Bangladesh
BBA, Finance and Banking

TECHNICAL SKILLS

BI & Visualization: Power BI (DAX, dashboards), Tableau, Advanced Excel (VLOOKUP, pivot tables, Solver, VBA)

Languages & Libraries: SQL (joins, subqueries, window functions), Python (pandas, NumPy, scikit-learn, matplotlib), R (ggplot2, regression, ANOVA)

Analytics Methods: Exploratory Data Analysis (EDA), Data Wrangling, Data Preprocessing, Data Cleaning, Data Segmentation, Data Quality, Statistics, Regression, ANOVA, Hypothesis Testing, Correlation Analysis, Data Mining, Business Intelligence, ETL, KPI Development, Forecasting

Database & Systems: RDBMS (PostgreSQL, MySQL, SQL Server), Data Validation, Data Integrity Checks, Process Mining (Celonis), Machine Learning (classification, clustering, neural networks)

PROFESSIONAL EXPERIENCE

Titas Gas Transmission & Distribution PLC | Deputy Manager, Financial Planning & Internal Control
Dec 2023 – Present
Dhaka, Bangladesh

- Use SQL and Python to extract, transform, and analyze 3M+ customer records from RDBMS, automating data validation and integrity checks — reducing manual processing by ~200 entries per quarter and improving data quality by 20%.
- Build Power BI dashboards (DAX) for financial KPIs, enabling real-time business intelligence reporting across 15+ departments and reducing manual reporting time by 40% (~8 hours/week saved).
- Apply regression and time-series forecasting to predict cash flow and budget variances with 85%+ accuracy, supporting data-driven decision making for CFO and VP Finance.
- Conduct exploratory data analysis (EDA) and correlation analysis on compliance metrics, achieving 20% improvement in audit accuracy; gather and document business requirements through cross-functional stakeholder collaboration to map financial workflows.

Titas Gas Transmission & Distribution PLC | Assistant Manager, Revenue Collection & Financial Reporting Dec 2018 – Dec 2023
Dhaka, Bangladesh

- Performed data mining and data segmentation using SQL and Excel on billing patterns, uncovering business trends that drove a 120% increase in revenue recovery ($1.2M+) over 6 months.

- Developed interactive Tableau dashboards tracking collection metrics by region and customer segment, delivering business intelligence insights to 3 cross-functional field teams.
- Implemented data validation and data cleaning frameworks in Python to detect billing errors, improving data quality and reducing disputes by 25% (~$300K saved annually).
- Conducted variance analysis identifying $2M+ in uncollected receivables; data-driven decision making recommendations to senior management recovered $800K+ within 90 days.

Bank Asia PLC | Probationary Officer Feb 2016 – Nov 2018

Dhaka, Bangladesh

- Performed data wrangling and exploratory data analysis using Excel on $10M+ commercial loan portfolio, supporting business analysis of credit risk for 200+ corporate borrowers.
- Developed automated credit scoring tools incorporating 15+ financial ratios using Excel (VLOOKUP, pivot tables), reducing loan evaluation time by 30% and improving portfolio data quality (18% reduction in delinquency).
- Built Excel dashboards tracking portfolio health metrics (NPL ratio, coverage ratio, vintage analysis), supporting data-driven decision making for senior management.

NCC Bank PLC | Management Trainee Officer Apr 2014 – Feb 2016

Mymensingh, Bangladesh

- Performed data validation and data quality assurance on 500+ monthly KYC records, achieving 99% accuracy and zero compliance violations over 2 years.
- Analyzed customer transaction patterns using data segmentation to identify suspicious activities, supporting compliance analytics and AML/CFT regulatory reporting.
- Built Excel-based reporting templates improving branch performance reporting efficiency by 25% and standardizing data collection processes across 3 departments.

PROJECTS

Strategic Retail Sales Forecasting | Time-Series Analysis – MSU Spring 2025

- Used Python and Power BI to conduct EDA, apply data preprocessing and ARIMA/exponential smoothing models for 12-month forecasts — achieving 90%+ accuracy; demonstrated full Business Analyst workflow from data cleaning to interactive dashboard delivery.

Enterprise AI Security Red Teaming Platform | MS Capstone – Ada Analytics | MSU |
github.com/SheikhMdFaysal/enterprise-ai-security-platform Spring 2026

- Lead business requirements gathering and documentation across 7 Agile sprints; apply data mining and segmentation for market research and 3-year financial modeling supporting a $10M+ Data and Analytics opportunity analysis.

Logistics Workflow Optimization | Process Mining (Celonis) – MSU Fall 2025

- Used Celonis to perform end-to-end data analysis, identify bottlenecks and process variants, and maintain documentation — reducing simulated cycle time by 22%.

CERTIFICATIONS

- Foundations of Data Ethics – INFORMS | Jan 2026
- Process Mining: Celonis Academic Fundamentals – Celonis | Jun 2025
- Process Mining: Celonis Foundations – Celonis | Apr 2025
- Google Crash Course on Python – Coursera/Google | Mar 2024
- Generative AI Mastermind Workshop – Outskill | Nov 2024
- SQL for Data Science – edX/IBM | In Progress
